

Customized Vault Doors

Sizes

VSI offers custom solutions when a standard 36" wide entry does not meet the requirement. There may be a special need to accommodate large items in secure vault storage – possibly money carts or forklifts – or to install small classic emergency doors, popular internationally.

VSI specializes in vault doors to meet any special need. Through unique manufacturing methods, VSI can expand or reduce the width, height and depth of a vault door. Whatever the requirement, VSI has the solution.

Automation

VSI has a track record of building electronically assisted doors – doors that open and close at a touch of a button. *This feature may now be added to any new VSI vault door.* This added feature, combined with specially sized doors, may provide the solution for ADA requirements. Remote controlled combination locks also may be added.

Customizing

The VSI vault doors provide great opportunity to *Set Yourself Apart*. Custom inlaid or etched designs and logos are available for the front and back of the door. Simply provide the artwork or choose from our existing designs.

Customized Vault Doors

For Special Sizes

Width	Normal Clear Opening	=	37"
	For Masonry Opening, Add 7"	=	44"
Height	Normal Clear Opening	=	78 1/2"
	For Masonry Opening, Add 7"	=	85 1/2"
Day Gate Width	4 1/2" Wider than Clear Opening		

For Special Sizes, add 7" to Desired Clear Opening for Height and Width.
Day Gate will increase proportionately.
